

Torsion test machine

MODEL: TQ-400S

Suitable for all kinds of high precision torsion testing. High force accuracy, easy operation, convenient settings and high degree of automation.

Customized testing equipment and tools

Test items

1. Rotating shaft torque life test
2. Rotating shaft torque life analysis

Product features

1. During the usage, test files can be added to according to customer needs.
2. Computerized display and recording of torque curve line life analysis
3. Wide application

Technical Parameters

Model	TQ-400S
T-axis forward/reverse Max. rotation angle	360°
Max. test count	99,999,999 times
Control method	PLC+IPC
Display method	IPC monitor
Machine size	870X510X1800mm (L/W/H)
Max. power	1200W
Power supply	AC 220V 50Hz
